“Open Source provides users with the opportunity to Study, Copy, Modify and Distribute the software and its source code. This promotes knowledge economy and ‘sustainable economic development’ as envisaged in vision 2036.”

Background

Retention Range is an Open Source Solutions company headquartered in Gaborone, Botswana. The company's philosophy is anchored on Software Freedom. Software users must have the freedom to use, share, and improve the software for their benefit and for the benefit of others. Open Source is a vehicle through which many developing nations can increase retention of capital spent on ICT imports. Retention Range is actively participating in the development of solutions based on Open Source. The company also manufactures RETENTION computers which mainly ship with open source softwares.

Vision

To have Free Libre Open Source Solutions (FLOSS) in use across all sectors of the economy.

Mission

To enrich enterprises by exposing them to the freedoms of open source.

Values

Customer Centric – We exist for the customer,
 Botho (Ubuntu) – We serve as we wish to be served,
 Openness – Ready to share, unrestricted sharing of information,
 Software Freedom – Its yours, so use it as you wish.
